DSA03-Natural Language Processing

List of Lab Program

17. Write program demonstrates how to access WordNet, a lexical database, to retrieve synsets and explore word meanings in python.

Code:

```
import nltk
from nltk.corpus import wordnet as wn
nltk.download('wordnet', quiet=True)
nltk.download('omw-1.4', quiet=True)
word = "bank"
synsets = wn.synsets(word)
print("Word:", word)
print("Number of Synsets:", len(synsets))
for syn in synsets[:5]:
    print("\nSynset:", syn.name())
    print("Meaning:", syn.definition())
    print("Examples:", syn.examples())
```

Output:

```
Word: bank
Number of Synsets: 18

Synset: bank.n.01
Meaning: sloping land (especially the slope beside a body of water)
Examples: ['they pulled the canoe up on the bank', 'he sat on the bank of the river and watched the currents']

Synset: depository_financial_institution.n.01
Meaning: a financial institution that accepts deposits and channels the money into lending activities
Examples: ['he cashed a check at the bank', 'that bank holds the mortgage on my home']

Synset: bank.n.03
Meaning: a long ridge or pile
Examples: ['a huge bank of earth']

Synset: bank.n.04
Meaning: an arrangement of similar objects in a row or in tiers
Examples: ['he operated a bank of switches']

Synset: bank.n.05
Meaning: a supply or stock held in reserve for future use (especially in emergencies)
Examples: []
```
