DSA03-Natural Language Processing

List of Lab Program

19. Create a program for word sense disambiguation using the Lesk algorithm using python.

Code:

```
import nltk
from nltk.wsd import lesk
from nltk.tokenize import word_tokenize
nltk.download('wordnet', quiet=True)
nltk.download('punkt_tab', quiet=True)
nltk.download('omw-1.4', quiet=True)
sentence = "The fisherman sat on the bank of the river"
words = word_tokenize(sentence)
sense = lesk(words, 'bank')
print("Sentence:", sentence)
if sense:
    print("Target Word: bank")
    print("Meaning:", sense.definition())
    print("Synset:", sense.name())
else:
    print("No meaning found")
```

Output:

```
Sentence: The fisherman sat on the bank of the river
Target Word: bank
Meaning: cover with ashes so to control the rate of burning
Synset: bank.v.07
```
