List of Lab Program

24. Create a python program that recognizes dialog acts in a given dialog or conversation.

Code:

```
def recognize_dialog_act(sentence):
    sentence = sentence.lower().strip()
    if sentence.endswith("?"):
        return "Question"
    elif sentence.startswith(("hello", "hi", "hey")):
        return "Greeting"
    elif sentence.startswith(("please", "could you", "can you")):
        return "Request"
    elif sentence.startswith(("thank you", "thanks")):
        return "Thanking"
    elif sentence.startswith(("bye", "goodbye")):
        return "Goodbye"
    else:
        return "Statement"
dialog = [
    "Hello!",
    "Where is the library?",
    "Please help me.",
    "Thank you!",
```

```
    "Goodbye!"
]
print("Dialog Act Recognition:")
for sentence in dialog:
    act = recognize_dialog_act(sentence)
    print(sentence, "->", act)
```

Output:
